AURA CORE

PRIME

HIGH-CAPACITY NETWORK AUDIO MATRIX DSP

SHOWN: PRIME 1208 / FRONT + REAR

UP TO

64×64

DANTE AUDIO CHANNELS

The highest-capacity CORE level: a central processing platform for audio systems that reach across more spaces.

TWO ANALOG I/O CONFIGURATIONS

PRIME 88

8 analog inputs / 8 analog outputs

PRIME 1208

12 analog inputs / 8 analog outputs

More network. One intelligence.

Central processing for larger, more complex audio networks, with distributed I/O and matrix amplification.

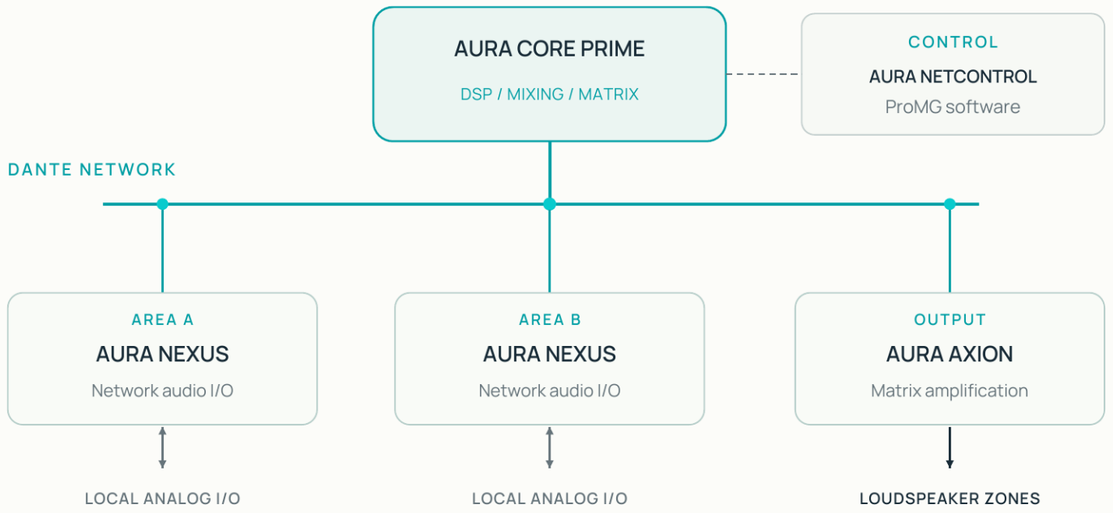
01 **Network capacity**
Up to 64×64 Dante audio channels.

02 **Central processing**
DSP, mixing and matrix routing in the CORE platform.

03 **Scalable I/O**
Build out AURA NEXUS I/O across the installation.

04 **Platform control**
AURA NETCONTROL interfaces and ProMG software.

DISTRIBUTED AUDIO / CENTRAL INTELLIGENCE



ONE PLATFORM, ACROSS MORE SPACES.

CORE PRIME processes. NEXUS distributes I/O. AXION amplifies.
