PROMIC
FROM EXPERIENCE TO INNOVATION

2011–2015 | FOUNDATION AND FIELD EXPERIENCE

PROMIC was founded in 2011 through hands-on involvement in real-world projects, delivering integrated audio systems for theaters, halls, and mosques. During this period, the company built its expertise by addressing practical on-site challenges and responding to actual customer needs.

2015–2020 | BUILDING THE BRAND IDENTITY

After years of field experience, PROMIC began developing and introducing products under its own brand, aiming to establish an independent identity and deliver solutions better aligned with market requirements. This phase included audio systems, microphones, distribution equipment, and control solutions.

2020–2025 | TRANSITIONING TO PROFESSIONAL SOLUTIONS

PROMIC evolved from offering individual products to developing integrated professional audio solutions. This period saw significant expansion into technologies such as DSP, loudspeaker management, audio networking, and professional mixing systems, with an increased focus on theaters, halls, and mosques.

2025–PRESENT | BUILDING AN INTEGRATED ECOSYSTEM

Today, PROMIC is building an integrated audio ecosystem that brings together products, digital signal processing, networking, control, and system management. The goal is to deliver a seamless and unified experience—from system design and integration to operation.

OUR DIRECTION

To create professional audio solutions built on more than a decade of hands-on field experience, while continuing to develop technologies and products capable of competing in regional and global markets

PROMIC PROUDLY INTRODUCES ITS OWN PROFESSIONAL PRODUCT LINE

Professional Installations • Advanced Technology • Reliable Support & Warranty

ONE FAMILY
EVERY SPACE

INTRODUCTION

PRIVO™ is PROMIC's professional installation loudspeaker family, created to deliver clear, reliable and consistent sound across public, commercial, hospitality and architectural environments.
From discreet ceiling audio to weather-resistant landscape systems, every PRIVO solution is developed around the character of the space, the demands of the installation and the experience of the listener.
PRIVO™ does more than add sound to a project. It makes sound a natural part of the environment.

ENGINEERED FOR EVERY INSTALLATION

Every project presents a different acoustic, architectural and environmental challenge.
PRIVO™ brings together multiple loudspeaker formats within one coordinated ecosystem, giving consultants, integrators and installers the flexibility to build the right solution for every area of a project.
Whether the priority is discreet integration, focused coverage, architectural appearance or outdoor durability, PRIVO™ provides a clear path from space requirements to system selection.

SPEAKERS

CEILING
Discreet overhead sound for clean architectural integration.

WALL
Flexible surface-mounted sound where ceiling installation is not suitable

PENDANT
Visible sound solutions designed for open and high-ceiling interiors.

COLUMN
Slim, controlled coverage for speech-focused and architectural applications

ROCK
Natural-looking loudspeakers that blend into landscaped surroundings.

GARDEN
Focused outdoor area coverage for pathways, lawns and hospitality spaces.

B SERIES PREMIUM INSTALLATION
Elevated performance for demanding professional spaces.

LANDSCAPE AUDIO & LIGHTING
Integrated sound, illumination and bass for complete outdoor environments.

CLEAR SOUND
Designed to maintain intelligibility, tonal balance and consistent listening across the intended coverage area.

FLEXIBLE INSTALLATION
A broad selection of ceiling, wall, column, pendant and outdoor formats for different project requirements.

ARCHITECTURAL DESIGN
Products created to integrate naturally into interiors, façades and landscaped environments.

RELIABLE ERFORMANCE
Professional installation solutions developed for dependable daily operation across demanding applications.

FIND THE RIGHT SOUND FOR YOUR SPACE

PRIVO™ is not a collection of unrelated loudspeakers. It is one complete architectural audio ecosystem. Each category addresses a different relationship between sound and space, while every product remains connected through the same PROMIC engineering philosophy, visual language and commitment to reliable performance.

Space Requirement	PRIVO Category	Recommended Models
Discreet overhead coverage	Ceiling Speakers	PSP4011, PSP4011L, PSP7011, PSP7011L PSP402, PSP402BT, PSP8025
Premium architectural installation	Wall Speakers	B5, B6
Surface-mounted indoor or outdoor sound	Pendant Speakers	P5, P6
Slim and focused vertical coverage	Column Speakers	K2, K3
Open-ceiling architectural audio	Rock Speakers	R4, R6, R8
Outdoor sound with integrated lighting	Garden Speaker	G5
Natural landscape integration	B Series	BS-4, BS-6, BS-8, BS-60, BL-4
Dedicated garden area coverage	Landscape Audio & Lighting	L1, L2, S8

01 CHOOSE THE SPACE
Interior • Exterior • Architectural • Landscape

02 DEFINE THE COVERAGE
Discreet • Localized • Wide • Focused

03 SELECT THE INSTALLATION FORMAT
Ceiling • Wall • Column • Pendant • Landscape

04 BUILD THE COMPLETE SYSTEM
Full-Range Sound • Lighting • Bass • Environmental

Start with the environment.
Define the installation.
Select the right PRIVO™ solution.

CEILING SPEAKERS

BUILT IN, HEARD CLEARLY

PRIVO™ ceiling speakers deliver clear, evenly distributed sound while remaining visually discreet within the architecture.

The range provides multiple formats for background music, paging, speech reinforcement and general public-address applications, allowing the system designer to select the appropriate size, output and connection type for each space.

PERFECT FOR

Hotels • Offices • Retail Spaces • Meeting Rooms • Education Facilities
Restaurants • Public Buildings • Houses of Worship

CEILING RANGE

Compact Coverage • PSP4011, PSP4011L
Expanded 6-Inch Coverage • PSP7011, PSP7011L
Bluetooth-Enabled Two-Speaker Solution • PSP402, PSP402BT
Higher-Output Ceiling Audio • PSP8025

CEILING RANGE

Compact Coverage • Expanded 6-Inch Coverage • Bluetooth-Enabled 2-Speaker Solution
Higher-Output Ceiling Audio

COMPACT COVERAGE

PSP4011
CEILING SPEAKER

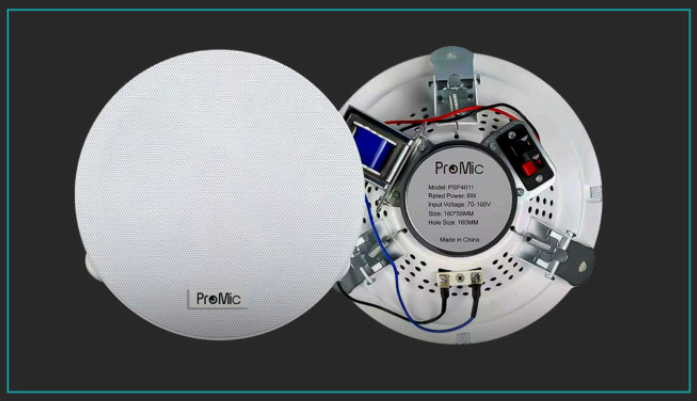
The essential PRIVO™ ceiling solution for clear and dependable distributed audio in everyday commercial and public-address installations.

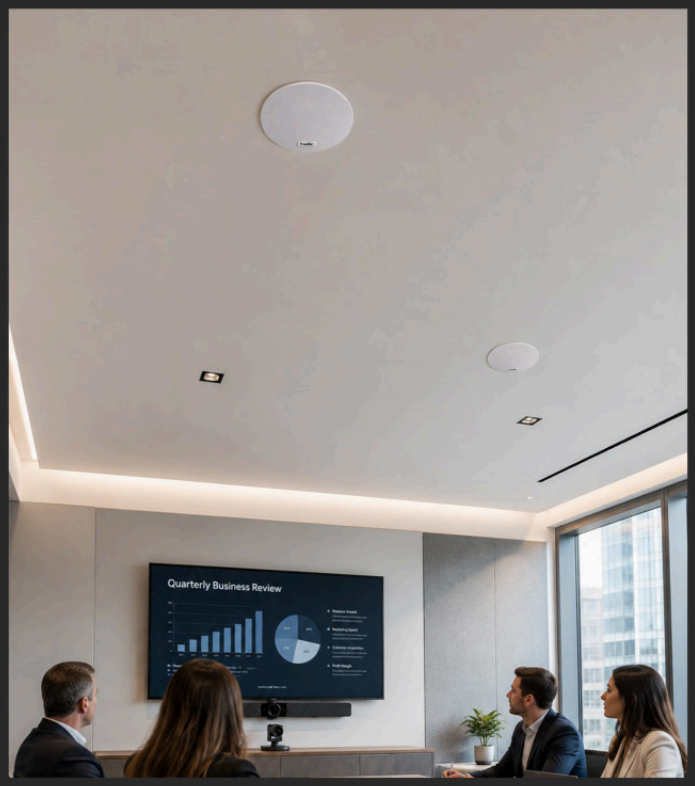
Designed for projects requiring discreet appearance, practical installation and consistent overhead coverage.

PSP4011L
LOW IMPEDANCE CEILING SPEAKER

A low-impedance version of the PSP4011 developed for applications using conventional amplifier channels and localized speaker circuits.

It provides the same compact architectural approach with greater system-design flexibility.





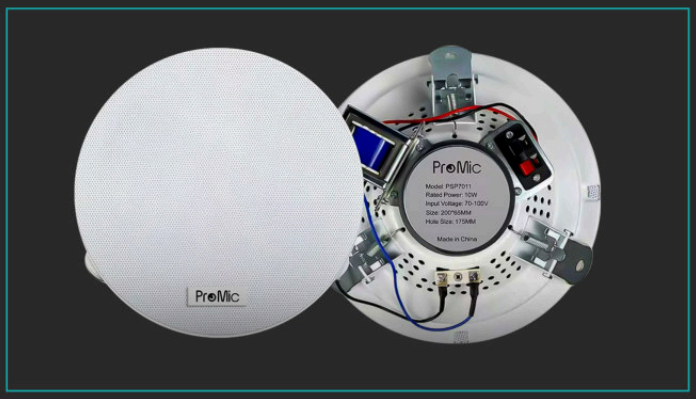
CEILING RANGE

Compact Coverage • Expanded 6-Inch Coverage • Bluetooth-Enabled 2-Speaker Solution
Higher-Output Ceiling Audio

EXPANDED 6-INCH COVERAGE

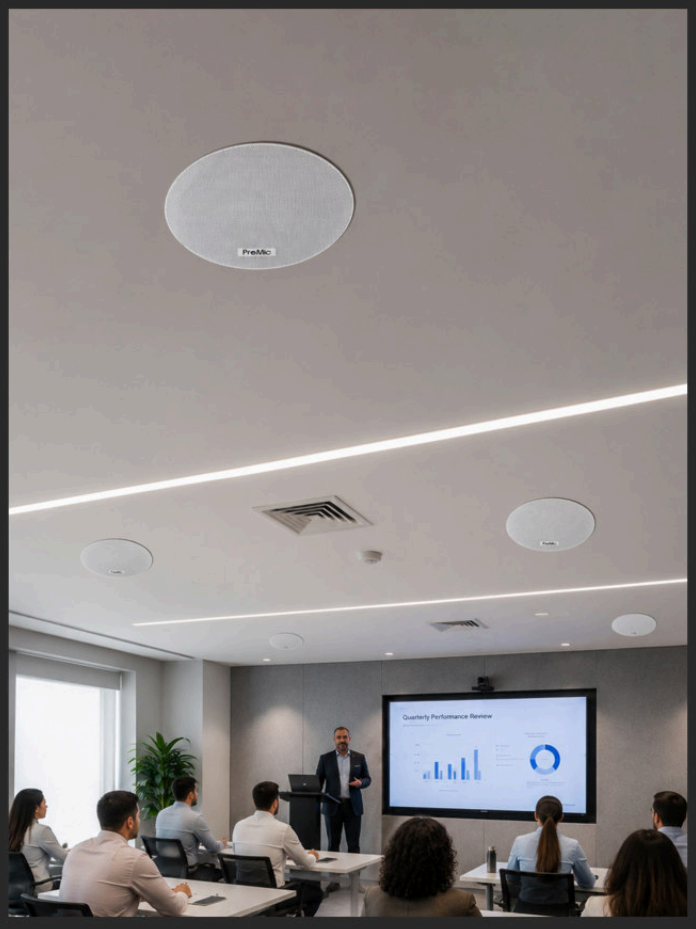
PSP7011
6-INCH CEILING SPEAKER

A larger ceiling format designed to provide fuller sound and broader coverage across medium-sized commercial and public spaces.



PSP7011L
6-INCH LOW IMPEDANCE CEILING SPEAKER

Combines the expanded coverage of a 6-inch ceiling format with low-impedance connectivity for conventional audio systems.



CEILING RANGE

Compact Coverage • Expanded 6-Inch Coverage • Bluetooth-Enabled 2-Speaker Solution
Higher-Output Ceiling Audio

BLUETOOTH-ENABLED TWO-SPEAKER SOLUTION

PSP402
4-INCH PASSIVE CEILING SPEAKER

A compact 15W low-impedance ceiling speaker designed for clear and reliable audio distribution across indoor commercial environments.
Its 8Ω configuration allows it to operate as a passive companion speaker connected directly to the Bluetooth-enabled PSP402BT.

PSP402BT
4-INCH BLUETOOTH CEILING SPEAKER

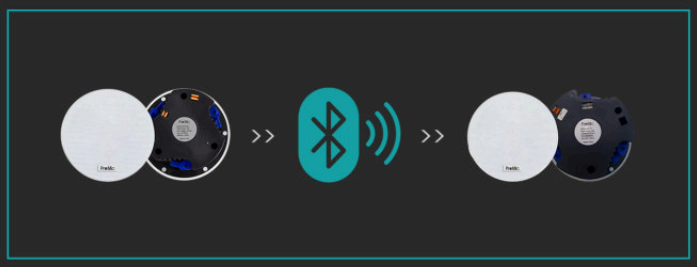
A powered ceiling speaker with integrated Bluetooth connectivity, allowing audio to be streamed wirelessly from a compatible source.
The PSP402BT can be connected to a PSP402 passive speaker to create synchronized two-speaker coverage from one Bluetooth audio source.

Bluetooth Pair Solution
ONE BLUETOOTH CONNECTION.
2-SPEAKER COVERAGE.

BLUETOOTH AUDIO SOURCE

PSP402BT >> WIRED SPEAKER LINK >> PSP402

The PSP402BT receives the Bluetooth audio signal and shares it with the connected PSP402, creating a simple and coordinated ceiling-audio solution.



CEILING RANGE

Compact Coverage • Expanded 6-Inch Coverage • Bluetooth-Enabled 2-Speaker Solution
Higher-Output Ceiling Audio

HIGHER-OUTPUT CEILING AUDIO

PSP8025
25W CEILING SPEAKER

A higher-output ceiling solution for installations requiring increased sound level, greater coverage and confident performance across larger areas.

CEILING RANGE SERIES

Ready for next Series?
Move to Wall Speakers

WALL SPEAKERS

SOUND WHERE ARCHITECTURE DEMANDS IT

PRIVO™ wall speakers provide flexible surface-mounted sound for spaces where ceiling installation is unavailable, impractical or architecturally undesirable.

Designed for easy positioning and direct coverage, the range supports background music, paging and general sound reinforcement across indoor and weather-exposed environments.

PERFECT FOR

Hotels and Corridors • Retail Spaces • Restaurants • Meeting Rooms • Terraces • Covered Outdoor Areas
Education Facilities • Commercial Buildings

WALL SPEAKERS

B5 • WALL SPEAKER

A versatile wall-mounted loudspeaker designed for clear everyday sound across commercial, hospitality and public environments.

Its surface-mounted format allows sound to be positioned precisely where the architecture and coverage plan require it.

Best Suited To

Indoor Commercial Spaces • Hotel Corridors • Meeting Rooms • Retail Environments • Restaurants
General Background Music

B6 • WEATHERPROOF WALL SPEAKER

A weather-resistant wall-mounted solution for projects requiring dependable sound in outdoor or environmentally exposed areas.

It extends the PRIVO™ wall-speaker concept beyond the interior while maintaining the same family identity.

Best Suited To

Terraces • Outdoor Hospitality • Building Façades • Covered Walkways • Poolside Areas
Weather-Exposed Commercial Spaces

Choose B5 for:

• Controlled indoor wall coverage.

Choose B6 when:

• The same installation approach must continue into weather-exposed areas.

WALL SPEAKERS

B5 • B6

B5, B6

B5
WALL SPEAKER

A versatile wall-mounted loudspeaker designed for clear everyday sound across commercial, hospitality and public environments.
Its surface-mounted format allows sound to be positioned precisely where the architecture and coverage plan require it.

B6
WEATHERPROOF WALL SPEAKER

A weather-resistant wall-mounted solution for projects requiring dependable sound in outdoor or environmentally exposed areas. It extends the PRIVO™ wall-speaker concept beyond the interior while maintaining the same family identity.

Ready for next Series?
Move to COLUMN SPEAKERS

PENDANT SPEAKERS

SOUND THAT BECOMES PART OF THE DESIGN

In open-ceiling spaces, the loudspeaker becomes a visible architectural element.

PRIVO pendant speakers are designed to deliver clear, evenly distributed sound while complementing the visual language of restaurants, cafés, retail environments and contemporary commercial interiors.

PERFECT FOR

Restaurants • Cafés • Retail Stores • Hotel Lobbies • Showrooms • Open-Ceiling Offices • Hospitality Interiors
Contemporary Commercial Spaces

PENDANT SPEAKERS

P5 • 5-INCH PENDANT SPEAKER

A compact architectural pendant speaker for background music and distributed audio in smaller open-ceiling spaces.
Its suspended format brings sound closer to the listening area while maintaining a clean and intentional appearance.

P6 • 6-INCH PENDANT SPEAKER

A larger pendant format developed for spaces requiring fuller sound, greater acoustic presence and broader coverage.

Choose P5 for:

- Compact and discreet pendant coverage.

Choose P6 when:

- The space requires a larger format and stronger acoustic presence.

PENDANT SPEAKERS

P5 • P6

P5, P6

P5
5-INCH PENDANT SPEAKER

A compact architectural pendant speaker for background music and distributed audio in smaller open-ceiling spaces. Its suspended format brings sound closer to the listening area while maintaining a clean and intentional appearance.

P6
6-INCH PENDANT SPEAKER

A larger pendant format developed for spaces requiring fuller sound, greater acoustic presence and broader coverage.

Ready for next Series?
Move to Column Speakers

COLUMN SPEAKERS

SLIM FORM, WIDE COVERAGE

PRIVO™ column speakers combine a narrow architectural profile with focused sound distribution.

Their vertical form makes them particularly suitable for speech, paging and background-music applications where clear coverage is required without introducing a visually dominant loudspeaker enclosure.

PERFECT FOR

Houses of Worship • Hotel Lobbies • Corridors • Public Buildings • Transport Areas • Retail Spaces
Covered Outdoor Areas • Speech-Focused Installations

COLUMN SPEAKERS

K2 • WEATHERPROOF COLUMN SPEAKER

A compact weatherproof column solution for focused speech and music coverage across indoor and outdoor installation environments.

The K2 is suited to projects requiring a slim appearance and controlled sound distribution within a smaller format.

K3 • WEATHERPROOF COLUMN SPEAKER

A larger column option for applications requiring increased acoustic presence while maintaining the same narrow architectural form and weather-resistant construction.

"K2 & K3" Best Suited To

Mosques and Houses of Worship • Hotel Entrances • Covered Walkways • Public Facilities • Retail Areas
Architectural Outdoor Spaces

Family Relationship

- "K2" Compact Column Coverage
- "K3" Expanded Column Coverage

COLUMN SPEAKERS

K2 • K3

K2, K3

K2
WEATHERPROOF COLUMN SPEAKER

A compact weatherproof column solution for focused speech and music coverage across indoor and outdoor installation environments.
The K2 is suited to projects requiring a slim appearance and controlled sound distribution within a smaller format.

K3
WEATHERPROOF COLUMN SPEAKER

A larger column option for applications requiring increased acoustic presence while maintaining the same narrow architectural form and weather-resistant construction.

Ready for next Series?
Move to Rock SPEAKERS

ROCK SPEAKERS

SOUND THAT BLENDS INTO NATURE

PRIVO™ Rock Speakers deliver outdoor sound through enclosures designed to become part of the landscape.

Instead of introducing conventional loudspeaker boxes into gardens and planted areas, the Rock Series allows sound to remain present while the technology visually recedes into its surroundings.

PERFECT FOR

Gardens • Hotel Landscapes • Resort Grounds • Poolside Areas • Outdoor Restaurants • Villa Pathways
Planted Commercial Areas • Leisure Environments

SERIES LOGIC

R4 • Compact Localized Coverage
R6 • Balanced Everyday Landscape Audio
R8 • Larger Format with Greater Acoustic Presence

Choose the size according to the required coverage, listening distance and desired acoustic presence.

ROCK SPEAKERS

R4 • R6 • R8

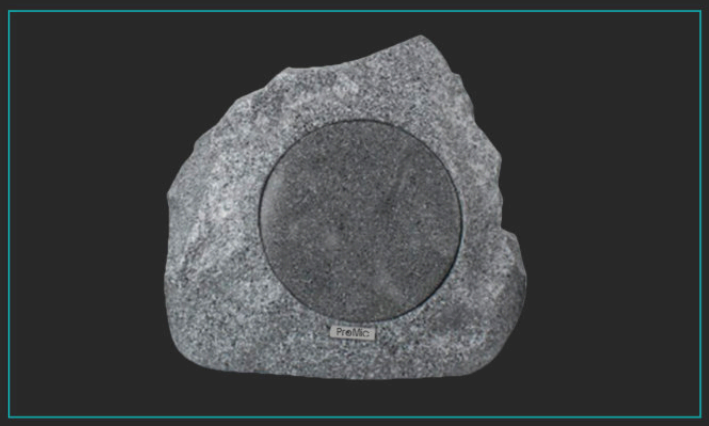
R4, R6, R8

R4
4-INCH ROCK SPEAKER

The compact entry into the PRIVO™ Rock Series. Designed for localized background music around pathways, planting zones and smaller garden areas.

R6
6.5-INCH ROCK SPEAKER

A versatile mid-size landscape speaker that balances discreet integration with fuller outdoor sound.



R8
8-INCH ROCK SPEAKER

The largest Rock Series format, developed for applications requiring stronger acoustic presence across more open landscape areas.

Ready for next Series?
Move to GARDEN AUDIO

GARDEN AUDIO

FOCUSED SOUND, BUILT FOR THE OUTDOORS

PRIVO™ Garden Audio brings clear, dependable sound directly into lawns, pathways and outdoor gathering areas.

The category is designed for projects that need purpose-built landscape coverage in a durable format that integrates naturally into the surrounding environment.

PERFECT FOR

Private Gardens • Hotel Landscapes • Restaurant Terraces • Poolside Areas • Outdoor Seating • Pathways
Villa Projects • Commercial Landscapes

KEY HIGHLIGHTS

5.25-Inch Driver • 40W Power Handling • 8Ω Low-Impedance Operation • IP66 Environmental Protection

TYPICAL APPLICATION

Audio Source >> System Amplifier >> Multiple G5 Garden Speakers >> Consistent Area Coverage

G5

5.25-INCH GARDEN AREA SPEAKER
CLEAR COVERAGE FOR OPEN-AIR SPACES.

G5 is a dedicated garden-area loudspeaker designed for reliable sound distribution across outdoor hospitality, residential and commercial landscapes. Its compact outdoor form allows it to be positioned close to the listening area, helping achieve controlled and consistent coverage without requiring excessive sound levels from distant sources.

From background music along a pathway to focused coverage around an outdoor seating area PRIVO™ Garden Audio places sound exactly where the project needs it.

Ready for next Series?
Move to B Series

B SERIES

PREMIUM INSTALLATION SPEAKERS

A step above conventional installation audio.

The PRIVO™ B Series is created for spaces where sound quality, architectural integration and professional presentation carry equal importance.

Developed as the premium installation tier within PRIVO™, the series gives consultants and system designers a refined solution for projects that demand greater performance without compromising the visual character of the space.

PERFECT FOR

Premium Hospitality • Executive Meeting Spaces • Retail Environments • Restaurants
Architectural Interiors • High-Quality Commercial Installations

B SERIES

BS RANGE "4, 6, 8" • ONE DESIGN LANGUAGE, THREE LEVELS OF SCALE

The BS range allows system designers to maintain a unified architectural appearance while selecting the format that best matches the size and acoustic requirements of the space.

Typical Environments

Premium Hospitality • Executive Meeting Spaces • Retail Environments
Restaurants • Architectural Interiors • High-Quality Commercial Installations

"BS-60, BL-4" • PREMIUM SOUND, BUILT FOR DEMANDING SPACES

BS-60 and BL-4 extend the B Series into specialized professional applications, giving system designers additional options for projects that require stronger coverage, architectural flexibility and the premium identity of the PRIVO™ family.

Project Focus

Premium Commercial Spaces • Hospitality Projects • Architectural Audio • Meeting and Presentation Areas
Public Buildings • High-Quality Fixed Installations

"THE PREMIUM STEP-UP" • WHEN THE SPACE DEMANDS MORE

The B Series represents the premium step-up within the PRIVO™ ecosystem.
It is intended for projects where the loudspeaker is not selected only by size or output, but by how effectively it supports the architecture, the listening experience and the overall quality of the installation.

Choose the B Series When:

- Architectural integration is a primary requirement.
- The project demands an elevated visual and acoustic standard.
- Multiple spaces must share one consistent product language.
- The loudspeaker must support both the design intent and the engineering brief.
- Long-term installation quality is as important as initial performance.

A premium installation should look intentional, sound natural and perform reliably.

B SERIES

BS RANGE "4, 6, 8" • BS-60 • BL-4

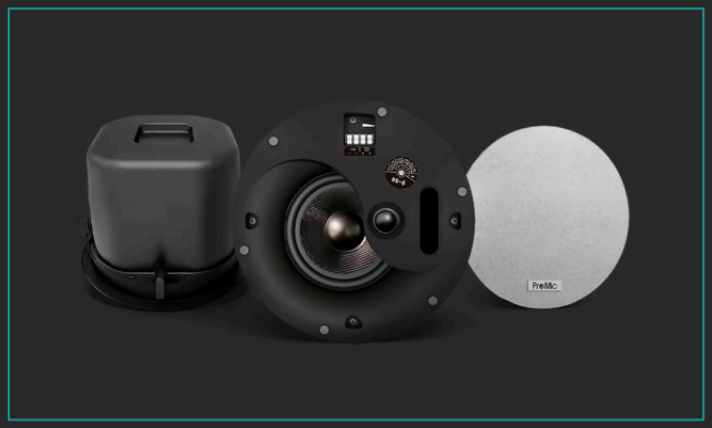
BS RANGE "4, 6, 8"

BS-4
THE COMPACT FORMAT

A discreet premium installation solution for smaller rooms and areas where visual integration is essential.

BS-6
THE VERSATILE FORMAT

A balanced solution for medium-scale spaces requiring stronger presence while preserving a clean architectural appearance.



BS-8
THE LARGE FORMAT

The largest format within the BS range, created for applications that demand greater acoustic presence and expanded coverage.

B SERIES

BS RANGE "4, 6, 8" • BS-60 • BL-4

BS-60, BL-4

BS-60
PREMIUM INSTALLATION SPEAKER

Designed for professional spaces where confident sound delivery and dependable installation performance are essential.

BL-4
ARCHITECTURAL INSTALLATION SPEAKER

A refined installation solution developed for projects where loudspeaker form, placement and architectural integration must work together.

Ready for next Series?
Move to Landscape Audio & Lighting

LANDSCAPE AUDIO & LIGHTING

LIGHT THE SPACE, FILL IT WITH SOUND

Outdoor environments are experienced through more than sound alone.

PRIVO™ Landscape Audio & Lighting combines architectural illumination, distributed audio and dedicated low-frequency support to create one coordinated experience for gardens, villas, hotels and outdoor hospitality spaces.

PERFECT FOR

Private Villas • Hotels and Resorts • Restaurants and Cafés • Outdoor Lounges • Poolside Areas
Garden Walkways • Hospitality Landscapes • Architectural Outdoor Projects

SIGNATURE SOLUTION

LIGHT + SOUND + BASS

One Environment, One Coordinated System.

THE COMPLETE LANDSCAPE EXPERIENCE

THREE ELEMENTS, ONE COMPLETE EXPERIENCE.

The PRIVO™ landscape system is designed as one integrated solution rather than three unrelated products.

L1
FLOOR-LEVEL LIGHT + SOUND
L1 combines illumination and audio at landscape level, helping define pathways, planting areas and outdoor gathering spaces.

L2
WALL-MOUNTED LIGHT + SOUND
L2 extends the same experience to walls, façades and vertical architectural surfaces.

S8
DEDICATED OUTDOOR BASS
S8 adds the low-frequency foundation required to give outdoor music greater depth, warmth and impact.

SYSTEM FORMULA

L1 + L2 + S8
Distributed Sound + Architectural Lighting + Low-Frequency Support
= The Complete PRIVO Landscape Experience

LANDSCAPE SYSTEM PLANNING

DESIGN THE EXPERIENCE, NOT JUST THE SPEAKER LOCATIONS.

A successful outdoor audio system should distribute sound evenly, integrate naturally with the landscape and maintain a balanced listening experience across the complete area.

SYSTEM ROLES

L1
Pathways • Planting Areas • Floor-Level Zones

L2
Walls • Façades • Entrances • Vertical Surfaces

S8
Central or Distributed Low-Frequency Support

TYPICAL SIGNAL CONCEPT

Music Source >> System Amplification >> L1 + L2 Distributed Sound + S8 Low-Frequency Support >> Complete Landscape Experience

Sound that surrounds the space • Lighting that defines it • Bass that brings it to life

LANDSCAPE AUDIO & LIGHTING

L1 • L2 • S8

L1, L2, S8

L1
FLOOR LIGHT SPEAKER

An integrated landscape element that combines floor-level illumination with distributed sound.
Designed for pathways, planted areas, terraces and outdoor hospitality environments where visible equipment should remain part of the landscape design.

L2
WALL LIGHT SPEAKER

A wall-mounted lighting and audio solution for façades, perimeter walls, entrances and outdoor seating areas.
L2 brings sound and illumination together through one coordinated architectural format.

S8
8-INCH LANDSCAPE SUBWOOFER

The low-frequency component of the PRIVO landscape system.
S8 supports L1 and L2 by adding deeper bass and a fuller musical experience across open outdoor spaces.

S8 is not an isolated product.
It is the bass foundation that completes the L1 and L2 landscape experience.

Ready for next Product?

WHERE PRIVO™ LIVES

ONE PROJECT, MULTIPLE SPACES, ONE PRIVO ECOSYSTEM

PRIVO™ is designed around real spaces, not isolated product categories.

Each project can combine multiple PRIVO formats to create one coordinated audio experience across interior, exterior and transitional areas.

HOTELS & HOSPITALITY

Ceiling speakers for guestrooms and corridors.
Pendant speakers for restaurants and cafés.
B Series for premium public areas.
Landscape solutions for gardens and terraces.

RECOMMENDED:
PSP Series • B Series • P5 / P6 • L1 / L2 / S8

MOSQUES & HOUSES OF WORSHIP

Discreet ceiling coverage for supporting areas.
Slim column speakers for focused speech reproduction.
Weatherproof solutions for entrances and outdoor areas.

RECOMMENDED:
PSP Series • K2 / K3 • B6

RETAIL & SHOWROOMS

Ceiling audio for general coverage.
Wall speakers for flexible positioning.
Pendant speakers for open-ceiling architectural spaces.

RECOMMENDED:
PSP Series • B5 • P5 / P6 • B Series

COMMERCIAL & PUBLIC SPACES

A coordinated mix of ceiling, wall and premium installation speakers for offices, education facilities, public buildings and meeting environments.

RECOMMENDED:
PSP Series • B Series • B5 • MP-Compatible Installation Systems

RESTAURANTS & CAFÉS

Pendant and wall speakers for interior atmosphere, with landscape audio extending the same experience into terraces and outdoor dining areas.

RECOMMENDED:
P5 / P6 • B5 / B6 • L1 / L2 / S8

GARDENS & OUTDOOR SPACES

Integrated lighting and audio, discreet rock speakers, dedicated garden coverage and low-frequency support for complete outdoor environments.

RECOMMENDED:
L1 • L2 • S8 • R4 / R6 / R8 • G5

Select each loudspeaker by its application

Then connect every area through one coordinated system design

PRIVO™ SELECTION GUIDE

CHOOSE BY SPACE, SPECIFY BY REQUIREMENT

Use the guide to identify the appropriate product format before confirming the detailed power, impedance, environmental and system requirements from the approved technical datasheet.

Model	Type	Known Format	System Version	Environmental Use	Primary Application
PSP4011	Ceiling Speaker	Compact Ceiling	6W / 70-100V	Indoor	Background Music / Paging
PSP4011L	Ceiling Speaker	Compact Ceiling	6W / 8Ω	Indoor	Local Amplifier Systems
PSP7011	Ceiling Speaker	6-Inch Ceiling	10W / 70-100V	Indoor	Expanded Ceiling Coverage
PSP7011L	Ceiling Speaker	6-Inch Ceiling	10W / 8Ω	Indoor	Local Amplifier Systems
PSP402	Ceiling Speaker	4-Inch Ceiling	15W / 8Ω	Indoor	Ceiling Background Audio
PSP402BT	Ceiling Speaker	4-Inch Ceiling	15W / 70-220V	Indoor	Bluetooth Ceiling Audio
